The European Banking Institute

1. Overview

The European Banking Institute (hereafter also “**EBI**” or the “**Institute**”) has been created to develop a pan-European research center for banking regulation and supervision which mirrors the pan-European character and the set-up of the SSM (hub and spokes model). EBI focuses on high-quality research into the legal and economic aspects of banking regulation and supervision. The Institute will focus its work in research projects in the field of law, economics and accounting. The Institute shall endeavor to provide academic input to banking regulators, supervisors and the private sector in Europe.

The purpose of the Institute is to conduct high quality research, to distribute knowledge and to promote the dialogue between scholars, regulators, industry representatives and advisors in relation to issues concerning the regulation and supervision of financial institutions and financial markets from a legal, economic and any other related viewpoint. EBI will thus collaborate mainly with European academic institutions and the relevant public and private sector institutions.

At a second stage, the EBI endeavors to develop a policy center with the target to establish a new truly pan-European think tank in the area of banking regulation, supervision and banking resolution and any related areas.

3. Working Programme

The EBI is currently engaging in scholarly research in the following areas:

- Enhancements of the Single Rule Book and issues concerning convergence of supervisory practice in the EU;
- Proportionality of banking supervision laws, the limitation of risk orientated approaches and interaction between ICAAP/ILAAP and the SREP process;
- The interaction between early intervention measures and resolution planning and the need for pairing the SSM and SRM objectives;
- Bank business models, structural separation of trading and banking activities and profitability objectives;
- Interaction between macro prudential and micro prudential supervision, discretion of EU authorities and issues concerning a European level playing field;

- The foundations of enhanced supervision of significant and systemically important institutions: accounting, auditing, capital adequacy, cross border risk management and resolvability;
- Alignment of bank supervision, recovery and resolution objectives with principles of common insolvency law;
- Legal systems governing banks and their openness to innovation including FinTech;
- Individual rights in the financial regulatory structure including judicial adjudication of matters concerning market supervision in the EU and an impact assessment of the establishment of a specialised EU court; and
- Corporate governance models and remuneration policies for banks and the implementation of the governance provisions in the CRD IV package.

The EBI will welcome research of high international visibility that also employs innovative methods.
